

Unismart Update Notifications

V3.22 20141031

V3.22 Update mainly includes below parts:

- Model Search Function for Operating Unismart Device;
- Uni-APP, an Android based system for adding new credits;
- New Models added in.

Details of the update as below:

Hardware

1. Unismart Device

- **New Bluetooth module in V3.22**

A Unismart Device with a Bluetooth module can connect with any Android smartphone on which the Uni-App has been installed. By the smartphone, credits can be transferred into the Device.

Unismart Devices that support Bluetooth:

Item	Standard Device	Customized Device
Boot load	3.6C	3.6C
Device ID	ALUS-5752 and after	BLUS-1172 and after

2. JIGs(TestHeads)

- **Details of newly added JIGs**

JIG Code	Program version	Applicable for blank chip	Expected date of availability	Remark
BR	V1.0	APEX(BR1); OEM (RST-Brother)	2014-10-30	For operation with recently included resettable Brother inkjet chip (Both OEM chips and Apex replacement chips)

- **Details of changed JIGs**

New JIG				Former JIG				Reasons of replacement
JIG code	Program version	Applicable for blank chip	Expected date of availability	JIG code	Program version	Applicable for blank chip	Expected date of unavailability	

ST1	V1.5	Apex (S1;S2;S3;S4; S5;S6;T1;T2;T3)	2014-11-1	S/T	V1.4	Apex (S1;S2;S3; S4;T3)	2014-10-30	1. Remote auto upgrade function added; 2. Widened application range to cover T1, T2, S5, S6 series blank chips.
-----	------	--	-----------	-----	------	------------------------------	------------	--

3. Blank chips

- **Details of changed blank chips**

- Blank chips for the Samsung 1640 Series

P11/P12/P13S/P13L/P15/P23S/P23L/P21/P25/P35

Ever since August 2014, these chips changed from dedicated chips to universal chips. For details please refer to the Product Change Notification Apex released in August.

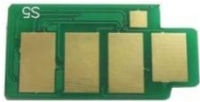

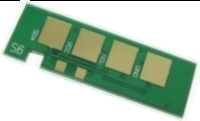

- Unismart is able to deal with both old and new chips; but to deal with new universal chips the Device must be upgraded to V3.22. (Customers please confirm the update package to be **Unismart Update software 5.01** (Download here: <http://www.apexmic.com/unismart/support-46.html>). After this, login Unismart network client end "ApexClient" to **pack and download** an upgrade package of 0 credits (for updating the device boot load), then please pack and download a second upgrade package of 0 credits (for updating the product range and JIG version), **make sure to PACK the second package only after you DOWNLOAD the first package**, and then use the two packages to update the device twice. Then the Unismart Device can be upgraded to V3.22).
- Special condition of certain blank chips (Application ranges and JIGs for other blank chips belonging to the 1640 series are not changed.)

Before				After				Remarks
PCB code	Extra-Code on chip	JIG code	For use in cartridge	PCB code	Extra-Code on chip	JIG code	For use in cartridge	
P11	SNP11U	P1	Samsung 108/106 series	P11	1520	P1	Samsung 106/104 series (Unavailable for 108)	1) The old P11 chip is still available. 2) Whether the chip is old or new can be judged by the extra-code on chip. 3) V3.22 Reference Table is made basing new chips. For old chips, please operate according to the V3.21 catalogue.
P21	SNP12U		Samsung 104 series					

Before				After				Remarks
PCB code	Extra-Code on chip	JIG code	For use in cartridge	PCB code	Extra-Code on chip	JIG code	For use in cartridge	
P25	SNP51U	P1	Samsung 205/305 and xerox 2305-2311 series	P25	1620	P1	Samsung 205/305/103; Xerox 2305-2311 series; Dell 7327series	<p>1) Whether the chip is old or new can be judged by the extra-codes on chip.</p> <p>2) The V3.22 Reference Table is made according to new chip. If users have older chips in stock, please operate according to the V3.21 catalogue.</p>
P35	SNP52U		Samsung 103/Dell 7327-7328 series					
P13S	—	P3S	Samsung 409/Dell 1230 series OEM cartridges	P3S	—	P3L	Samsung 407/409 OEM cartridges	<p>1) The V3.22 Reference Table is made according to new chip. If users have older chips in stock, please operate according to the V3.21 catalogue.</p>
P23S	—		Samsung 407 OEM cartridges					
P13L	—	P3L	Samsung 409 /Dell 1230 series compatible cartridges	P3L	—	P3L	Samsung 407/409 compatible cartridges	
P23L	—		Samsung 407 Compatible cartridges					

Important Notice: Since the above old and new chips have different application ranges, products of a same model may have different PCB and JIGs. The PCB and JIG information shown on the Unismart Device are all according to new chips and new Jig. For operation with the above old chips, please do not refer to the device's prompt of the PCB and Jig, but refer to the V3.21 Reference Table.

- **Details of newly added**

PCB Code	Chip photo	JIG code	Used for cartridges
S5		ST1	Samsung 709/809 cartridges
S6		ST1	Samsung 405 cartridges
BR1		BR	Brother 1 st generation inkjet cartridges

4. Package (for packing five JIGs)

Package	Photo	Remark	Usage											
Interior		Can hold up to 5 JIGs. If there are less than 5, pearl wool will be used to fill up the interior for the sake of transportation safety.	1. For packing no more than 5 JIGs. 2. In the case of purchasing Unismart Device with accessories, if there are more than 12 JIGs purchased, 12 will be packed into standard package, and the JIGs other than the 12 will be packed into this package. 3. If the customer only purchase JIGs without Unismart device, all JIGs are to be packed into this package.											
Package opened		The outside package and the effect of holding 5 JIGs.												
Outside package		The overview of the outside package												
Outside label	<table border="1"> <tr> <td>SO: 1316464</td> <td>Date: 2014.10.30</td> </tr> <tr> <td>JIG#</td> <td>QTY (pcs)</td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> <tr> <td> </td> <td> </td> </tr> </table>	SO: 1316464		Date: 2014.10.30	JIG#	QTY (pcs)								
SO: 1316464	Date: 2014.10.30													
JIG#	QTY (pcs)													

5. Labels

To ensure the unity and accuracy, all JIG labels are changed. The labels of JIG K and JIG AE0 are shown below as examples.

Before	After	Remarks
		<ol style="list-style-type: none"> After change, the JIG label only record JIG codes. Since the applicable chip PCB ranges of the JIGs keep widening, it is becoming unrealistic to show them on the JIG label. The Unismart device's product model interface can prompt relative PCB and JIG now, which can help users to quickly find the correct blank chip and JIG. Meanwhile users can refer to "Uni Component Catalog" for the applicable blank chip ranges of JIGs. JIGs delivered after October 27, 2014 are all with these new labels.
		
		
		

6. Installation method

No change.

Software

If the update software you are using is Unismart Update Software 5.01 (download at <http://www.apexmic.com/unismart/support-46.html>), login Unismart network client end "ApexClient" to pack and download an upgrade package of 0 credits (for updating the device boot load), then please pack and download a second upgrade package of 0 credits (for updating the product range and JIG version), **make sure to PACK the second package only after you DOWNLOAD the first package**, and then use the two packages to update the device twice. After such update, the following changes will take place on relative software of the Unismart system.

1. Update software: no change (Unismart Update software 5.01)

2. Device system software:

- **Version**

Bootload version: no change (3.6C);

Item	Before	After
Firmware version	V3.21	V3.22

You can enter Unismart Device's "Setup" Module to check the firmware version.

- **Device interface**

Interface/display	Before	After	Newly added functions
Select PCB interface			Model search function
Product model interface			Prompt corresponding blank chip's PCB Code and JIG code to write/read the model shown on the first row.
Version interface			"JIG Ver" replaced "Test Head", standing for JIG version. "JIG" replaced "Head", standing for the JIG's Code.
Glossary	Test Head	JIG	

- **Function: Model search function added**

Model search function has been added into the V3.22 Unismart system software.

In "Select PCB" interface, choose "Model Search" and enter. In the "Model Search" interface, type in the simplified code of printer model or cartridge model, and press the black button on device to start searching. For detail please refer to "[User Manual\(Uni-Device\) V3.22](#)".

3. JIG software

● **Details of changes**

JIG code	Changed item	Before	After	Remarks
P1	Software version	V1.0	V1.1 or V2.0	Applicable blank chip hardware has changed. After the device has been updated to V3.22, the JIG software will automatically update to V1.1 or V2.0, compatible with chips of both old and new versions.
	Applicable blank chip range	P11, P12, P15, P21, P25, P26, P35	P11, P12, P15, P21, P25, P26, P35	
P3L	Software version	V1.0	V1.1 or V2.0	
	Applicable blank chip range	P13L, P23L	P13L, P23L, P3L, P3S	
P14	Software version	V1.0	V1.1 or V2.0	
	Applicable blank chip range	P14	P14	
P3S	Software version	V1.0	V1.1 or V2.0	After the device has been updated to V3.22, the JIG software will automatically update to V1.1 or V2.0, but there is no change to the function.
	Applicable blank chip range	P13S, P23S	P13S, P23S	

4. Update client end “Unismart Update Software”: no change

5. Network client end “ApexClient”: no change

6. Uni-APP: Uni-APP for Android smartphones has been newly released. The APP allows credit purchase through mobile phone, and can send credits from the phone to the Unismart Device. You can go to <http://www.apexmic.com/unismart/support-46.html> to download and try. For detail please refer to **”User Manual (Uni-APP) V1.0”**.

7. Product range

In the product change this time, new models have been added, unnecessary models have been deleted, and several model code have been changed; for details please refer to the appended table Uni New Models V3.22. To avoid choosing wrong product model, please go to <http://www.apexmic.com/unismart/support-46.html> to download “Reference Table (Uni-Apex) V3.22” and “Reference Table (Uni-OEM) V3.22” for reference. Meanwhile, log in Unismart network client end “ApexClient” to read relating news on new product.

8. Language system: no change
